Holaluz acquires three Spanish installation companies to accelerate The Rooftop Revolution

After the announcement last July of its installation companies acquisition plan, together with the December 16th announcement of the capital entry of GmbH and Pelion Green Future Alpha GmbH with an investment of 7.5 million euros, Holaluz acquires its first three installers: Katae Energía SL. (Lérida), Serna Energía SL. (Alicante) y GHC instalaciones- Gestión Hidráulica Canarias, SL. (Tenerife).

The three acquisition operations allow Holaluz to consolidate its leadership position in the Spanish regions of Catalonia, Levante and the Canary Islands. The green energy company increases its installation total capacity by 25 % in Spain, accelerating the solar growth plan, ensuring operations scalability, and enabling control over the entire end-to-end process.

In this framework and to support the strong growth forecast for this year, Holaluz has opted to strengthen the teams focused on executing The Rooftop Revolution. That is why Holaluz plans to incorporate commercial solar experts and additional installers in the Spanish regions of Catalonia, Madrid, Valencia, the Balearic Islands, Murcia, Seville, and Malaga during the first quarter of 2022.

All these measures will create a hybrid structure of own installers and agreements with trusted local installers that will ensure the scalability of operations throughout Spain.

Holaluz understands the present electricity market price volatility as a unique opportunity to consolidate the Rooftop Revolution and transform the current energy model in Spain.

The Rooftop Revolution already encompasses 6,295 managed installations, 378,202 clients, and a representation portfolio of more than 1,630 MW as of September 30, 2021.
