Holaluz acquires the client portfolio of OVO Energy Spain

The acquisition of the client portfolio of OVO Energy Spain allows Holaluz to support the growth of its supply portfolio adding 6,500 domestic customers to its current base of 386,540 customers as of March 31. Holaluz grows its client portfolio alongside a company with a common purpose: both Holaluz and OVO Energy Spain want to transform the world, promoting a change in the energy model for the benefit of the planet and society as a whole.

This operation forms part of the company's M&A plan announced last September which aims to consolidate the energy sector.

OVO Energy, headquartered in the United Kingdom, is one of the largest independent electricity companies in Europe with more than 5 million customers globally. It was created in 2009 with the aim of transforming the energy sector through clear communication, impeccable service, and cheaper electricity.

This represents a further step in the green energy technology company's goal of leading the energy transformation towards a model based on distributed generation that will create the most impactful green energy community in southern Europe by connecting domestic customers to green energy and transforming every square meter of rooftop into 100% green energy.
